title: Need to reconsider the introduction of National Medical Commission.

SHRIMATI RAKSHATAI KHADSE (RAVER): Government has appointed a special panel to overhaul the reforms of Medical Sector and made a new draft to bring a nominated National Medical Commission (NMC) to revamp Medical Council of lndia (MCI) in order to bring in more Doctors, Professionals in the medical field. As MCI is an elected body, well known medical practitioners in the country can vote in electing the body of MCI apart from few nominated Members but from Medical profession only, while NMC may nominate any persons/professional on the NMC board. Bringing nonâ€"medicos into NMC is an attempt at denying doctors the privilege of self-regulation in contrast with some professional bodies working in the Country like Bar Council of India and Institute of Chartered Accountants of India. Hence, through this august House, I request the Minister to reconsider the induction of NMC and scrapping of MCI.
